## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pages 7-13, filed on July 28, 2006, with respect to claims 1-31 have been fully considered and are persuasive. The rejection of claims 1-27 has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 1-31 are allowed.

3. The following is an examiner's statement of reasons for allowance.

The prior art of record, taken alone or in combination, does not teaches the construction and method of operating a variable reluctance machine as a generator as described on:

independent claims 1 and 31, comprising the step of creating a bias flux that varies with rotor position and that links the at least one phase winding; and

independent claim 16, comprising means for creating a bias flux that varies with the position of the second part relative to the first part, and that links the at least one phase winding.

Dependent claims 2-15 and 17-30 are considered allowable by their respective dependence on allowed independent claims 1 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Art Unit: 2834

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
